JASON SPOONER

AI PRODUCT BUILDER | WEB DEVELOPMENT | SYSTEMS INTEGRATION

306-570-8341 | jasondspooner@gmail.com | jasondspooner.github.io | linkedin.com/in/jasondspooner

SUMMARY

Hands-on technology builder with more than 25 years of experience across software implementation, web development, infrastructure, and technical leadership. Founder of Minerva Computer Consulting and developer of Ridge Runner, an AI-powered video analytics project. Comfortable taking a problem from initial requirements through architecture, implementation, deployment, and support. Experienced across application, operating-system, network, and hardware layers, with a practical focus on building solutions people can actually use.

AI PRODUCT PROJECT

Ridge Runner Digital Solutions — Independent AI Product Project Current

- Building an AI-powered traffic-monitoring product that turns camera footage into useful events and analytics rather than simple motion alerts.
- Own the product and technical work: defining requirements, designing the architecture, implementing and testing components, deploying the system, and deciding what to improve next.
- Developing vehicle classification, animal detection, licence plate recognition, and traffic analytics around Reolink RLC-811A camera feeds.
- Designed the deployment around a headless Debian system with an i5 processor and 4 GB of RAM, requiring careful management of performance, memory, and processing workloads.
- Implementing event-based notifications, including macOS text-to-speech alerts, so users do not need to watch a dashboard continuously.
- Prepared an investor executive summary and developed the product's positioning and potential commercial use cases.

PROFESSIONAL EXPERIENCE

Minerva Computer Consulting — Founder & Technology Consultant 1999–Present

- Own client engagements from initial discovery and technical recommendations through implementation, documentation, and ongoing support.
- Deliver web design, systems integration, IT security, and infrastructure services, adapting solutions to each client's needs and constraints.
- Build long-term client relationships through practical solutions, clear communication, and responsive support.

ZS2 Technologies — IT Manager April 2022 – June 2024

- Led and supervised the IT team, coordinated technical priorities, and supported staff development in a hands-on environment.
- Implemented CRM solutions and integrated third-party applications to improve business workflows.
- Managed hardware infrastructure and network security while maintaining data integrity and system efficiency.
- Developed workflows, standard operating procedures, and training materials to support consistent operations and user adoption.
- Worked directly with employees to understand operational problems and translate them into practical system and process improvements.

Saskatchewan Health Authority — Senior Analyst 2001 – April 2022

- Supported two on-premises SharePoint farms and a Power BI Report Server within a large, complex organization.
- Managed daily data backup and retrieval across multiple SharePoint environments, protecting data integrity and availability.
- Delivered installations, deployments, and troubleshooting at client sites, working directly with users to restore service and resolve operational problems.
- Monitored network activity for suspicious traffic and maintained security protocols in support of the security department.
- Managed routine maintenance, server backups, and hardware infrastructure while balancing reliability, security, and user needs.

TECHNICAL SKILLS

AI & Product: AI video analytics; computer vision; motion detection; vehicle classification; animal detection; licence plate recognition; traffic analytics; Reolink camera integration; text-to-speech alerts

Web & Software: ASP.NET; C#; JavaScript; CSS; PowerShell; SQL Server; XML; XSLT; web services

Infrastructure: Debian Linux; network security; hardware infrastructure; backup and recovery; system audits; SharePoint 2003–2019; Power BI Report Server

Delivery: Requirements discovery; systems integration; CRM implementation; deployment; troubleshooting; technical documentation; SOPs; user training; client management

EDUCATION & CERTIFICATION

Network Systems Diploma, Honours — CDI College, Regina, Saskatchewan
CompTIA A+ Certification — CDI College, Regina, Saskatchewan
